

EPSU's North East Constituency – Solidarity with transport unions' action in Vilnius

The trade unions participating in EPSU's North East Constituency meeting on 16 September send their solidarity greetings to the municipal transport trade unions in Vilnius that have been organising protests in support of their demands for a collective agreement and pay rise. The meeting expressed concern that the mayor and the municipality had failed to react to the protests and to commit to negotiations.

The transport trade unions are concerned about the deteriorating quality of service and EPSU unions support their calls for decent work as the basis for quality services. The meeting calls on the municipality to negotiate a pay rise for workers, to invest in the service and to rule out any move to privatisation.
